DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5,13 are rejected under 35 U.S.C. 102(b) as being anticipated by Gossen (3473278).

Claim 1. Gossen discloses a skirting board comprising: a base profile (18,19) engaged to a wall and comprising a receiving portion (19) and a deflecting arm (18); and a guard profile (10), the guard profile comprising a protruding portion (16,17) that interfaces with the receiving portion of the base profile and a curved portion (11); wherein the guard profile combines with the base profile to provide at least one open space (as seen in the upper and lower portions between the guard profile and base), wherein the at least one open space (the upper space above element 19) is defined by the base profile, the guard profile and the wall (as seen in figures 3-4); and wherein the deflecting arm and the curved portion combine to provide a surface used to finish a corner produced by a floor and the wall.

Claim 2. The skirting board of Claim 1, wherein the receiving portion comprises at least one surface adapted to receive the guard profile (as seen in the figures).

Claim 3. The skirting board of Claim 2, wherein the protruding portion comprises at least one interface portion adapted to interface with one oblique surface (where 19 has an oblique surface).

Claim 4. The skirting board of claim 3, wherein the at least one open space is adapted to receive a cable.

Claim 5. The skirting board of Claim 3, wherein the base profile further comprises a plurality of openings, for attachment of the base profile to the wall (at 21).

Claim 13. The skirting board of claim 1, further comprising a second open space (the lower space below element 19) adapted to receive a cable, wherein the second open space is defined by the base profile, the wall and the floor.

Allowable Subject Matter

Claims 6-12 are allowed.
